800W Output LED

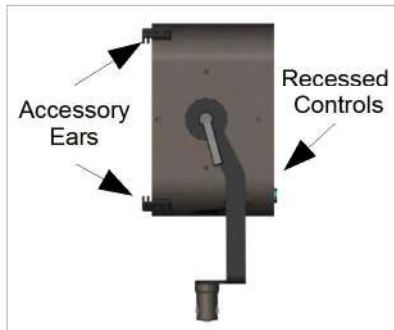

800W HMI Type Output AC/DC LED

Introducing the Frezzi SunLight II LED Portable Field Light, the ultimate lighting solution for broadcast news, sports, and field production. With 4 high-powered COB LED elements, this light outputs the equivalent of an 800W HMI light, making it one of the most powerful portable lights on the market.

Fully Weather-Proof
Only 5 Lbs

360 Degree Barn-Door Rotation

Compact Fixture 10 x 10 x 6.3"

The SunLight II's fixed color at 5600K with a 93+ CRI ensures the purest and highest output to match the sun, providing unmatched lighting quality for your on-the-go production needs. And with its ultra-light weight of under 5 pounds and compact 10"x10" chassis, you can easily take it wherever you need it.

At Frezzi, we always listen to our customers. We made the SunLight II even better than its predecessor, the Frezzi SunLight, by creating a smaller, lighter, and brighter fixture that is easy to use and transport. The fully rotatable and removable barn-doors, as well as the accessory ears for softbox and other modifiers, make it easy to customize your lighting to suit your specific needs.

The SunLight II is also fully ruggedized with all aluminum construction and made in the USA, making it tough enough to withstand even the most extreme field conditions. And with its fully weather-proof design, you don't have to worry about rain or dust getting in the way of your production.

When you need the most light in the smallest package, choose the Frezzi SunLight II LED Portable Field Light and experience the power and flexibility of professional lighting on-the-go.
