

New!

**New Professional Frezzi
Universal DV Lighting**

Frezzi[®]
ENERGY SYSTEMS

Universal Battery/Light Mounting Positions

**Battery Under
Camera Mount**

Battery On Universal DV Stick

**Battery On Top of
Camera Mount**

**Can be used for over
the crowd shoots**

Frezzi's New Professional DV Light Kits are extremely versatile and unlike any other light kit, it allows the user to keep battery, light and camera all together. No external battery or belt is needed when using camera and light.

The new kits provided two new universal accessories, a **UMS Universal Mounting Stick** that can be used to hold the Mini DV Camera, Light, and Battery all together with our **NP-1HCP Universal Battery/Light Holder**.

This set up will allow you to power the light mounted on the camera from the battery that can be mounted on the Universal Mounting Stick, underneath the camera or on top of virtually all DV cameras as an all in one unit.

The NP-1HCP can also be used in conjunction with the UMS and Light to make an all in one Light Stick with its own power separately from the camera if desired, or you can put light on a stand with our LB-5/8 adapter.

The new kits come with everything needed in one package to obtain a professional lighting solution for any Mini DV camera. It provides the shooter with the versatility of many mounting options never before available to achieve professional lighting results.

**Can be used as light
stick with its own
independent power!**

**Used to support
camera for stabilization
and to prevent fatigue**

**Complete Universal Kit
Includes Everything Needed**

Light Stick in Action
