

NEW

The Perfect Wireless Hair / Back Light Kit

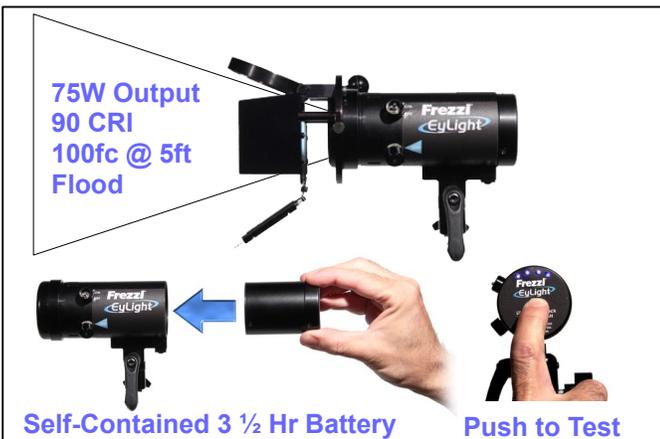

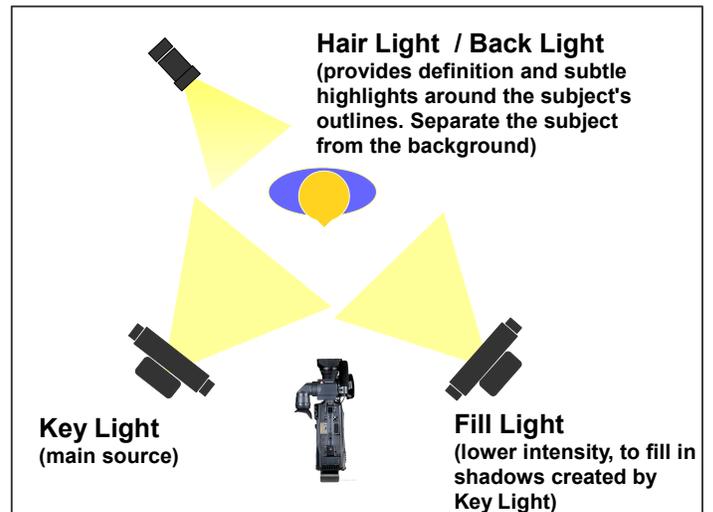

Professional's use Three Point Lighting as the gold standard for superior video and film production. It is highly desired for interview lighting situations. In ENG and EFP work it is hard to achieve because most Back/Hair lights are large and difficult to deploy often requiring large stands and booms with AC power

All that has changed! Frezzi's revolutionary self-contained LED EyLight with 3 ½ hour run time has been teamed with a small light weight stand and custom flexible goose-neck mounting system that can be deployed in seconds without power cords to provide the perfect Back/Hair light.

Available as the single back light kit **ELHK-C** (5000K) or **ELCK-W** (3000K) or as the Ultimate AC/DC travel friendly 3 point light kit, the **NEW U3PK** includes a Dual SkyLight Kit + Single EyLight Kit + Hair Light Mounting Kit for a complete solution for maximum flexibility.

Hair/Back Light Effect

- Self contained battery "all-in-one design" no cables
- Rechargeable Quick-Swap Battery Pack
- High-Output – 5X Output of typical LED lights
- Weatherproof rugged all aluminum construction
- Long run time 3 ½ hrs on a single battery
- Compact low profile space saving design
- Save hundreds per year on throw away "AA" batteries
- Long lasting Frezzi professional ENG/EFP workhorse
- Professional accessories – accepts Mini-Fill accessories
- Advanced dimmer control without color shift
