Frezzi HyLight™ – Breakthrough in Compact High Output LED Broadcast Lighting

Hawthorne, NJ – April 3rd, 2012

Frezzi introduces the HyLight™. A new innovative compact and travel friendly “all-weather” studio quality portable LED light for news, field production and studios.

Powered by AC Mains or Standard Broadcast Snap-on or V-Mount camera batteries, each HyLight™ delivers a clean and uniform light of high color quality from a single point Solid State Light LED source with state of the art efficiency. The output is fully dimmable without color shift and features interchangeable SSL LED Power Modules to change beam angle and color temperature in seconds.

When powered from a quick lock on-board brick battery the HyLight™ is a compact ultra portable stand mounted light fixture as well as a hand-held roaming light head which can be set up virtually in any location and weather condition. With on-board battery operation you are free of extension cords when required. Otherwise the kit supplied combo battery charger and AC adaptor will power the HyLight™ from your AC line continuously. In the studio HyLights can be used as low profile key and fill lights. Run time is over four hours on a fully charged Frezzi FLB-100 Lithium Battery.

The Frezzi HyLight™ Dual Head Kit has everything required for a two point lighting shoot, including seven foot stands, batteries, filters, combination power supply and battery charger in a single carry-on sized travel case. This unique Kit with its advanced HyLights, Batteries, Charger/Adaptor and Stands packaged into a compact lightweight kit eases the cost of transportation. The Dual Head HyLight™ kit is an effective and efficient system for field lighting and back-pack journalism. It is a superb lighting companion.

“With the Frezzi HyLight™ kit, you can now bring high-powered studio quality lighting out into the field as a very compact package. What normally took two or three flight cases now fit in one compact carry-on weather proof, light weight transport case. This allows camera crews to have the ultimate in professional lighting for field situations while taking less gear”, explains Kevin Crawford, VP of Engineering at Frezzi who led the HyLight™ LED design team.

Accessories for the light include a barn-door combo filter accessory, framed gels, hand-grips, snoots and various mounting hardware.

Frezzi has manufactured portable lighting and power products for the news media industry, both film and video for over 70 years. Frezzi Energy Systems is a division of Frezzolini Electronics Inc.
